HYUNDAI HYM17150SPX 139cc PETROL LAWN MOWER

Pushing a mower across a medium-sized lawn gets tiring. The Hyundai HYM17150SPX takes the effort out of the job with a self-propelled rear-wheel drive system. You guide the mower; the engine does the pushing. That makes a real difference halfway through a larger lawn, or when tackling a gentle slope.

Specification

Model	HYM17150SPX
Start Method	Recoil start
Engine	139cc four-stroke petrol
